

The reign of FM is almost over. Digital radio was the evolution. I almost never listen to the radio it is sub par compared to xm radio. I don't wanna hear 20 minutes of the hour and usually more of some guy telling a story of his life that not even his mom cares about or about some pill that will make my manhood larger or from car dealerships trying to sell me the biggest gas guzzler on the planet this week. I like music just music and only music. If XM decides that it wants to give out information to each city it feels like they should have the right to. If NAB is afraid that people will stop listening to the radio and get XM well they should be scared. Nothing lasts forever and radio is certainly one of the oldest media's around and it is being updated with Xm. So I appeal to you my congressman who is supposed to represent ME AND NOT THE NAB BECAUSE THEIR LOBBYIST PAID FOR HIS BEACH RESORT IN MAUI....yea i thought so.
